WORK EXPERIENCE

SelectHealth Murray, UT

Full Stack Software Engineer – Staff II Nov 2022 - Present

- Communicate current task progress, and keep other teams informed on total project completeness and expected completion date.
- Develop simultaneous full-stack development tasks through TypeScript, Angular, React, C# and SQL.
- Own full-stack creation of APIs and the front-end design/implementation for the users.
- Create, design and maintain CI/CD pipeline for multiple projects.
- Quickly learn and understand a diverse set of codebases to create new projects for different teams.
- Implement cloud systems for queue management between projects.

Motorola Solutions Salt Lake City, UT

Software Engineer Extern Jun 2022 – Sep 2022

- Spearheaded project development as the lead developer by quickly learning React.
- Ensured seamless communication between my intern team, a different established intern team and the senior developers.

Level Home Inc. Salt Lake City, UT

Backend Developer Extern Mar 2022 – Jun 2022

- Self-taught Python to develop an integrated project that interfaced with multiple large codebases.
- Created micro services to interact with databases and handle notifications.
- Participated in code reviews.

Empire Technological Group, LTD Salt Lake City, UT

Game Development Extern Jan 2022 – Mar 2022

- Led the successful recreation of an existing game from Java to Unity without access to the source code.
- Focused on recreating all aspects of the UI from the original game into Unity UI system.
- Participated in continuous playtesting of both the original and new game to ensure both are exactly the same.

PROJECTS

Severed Odyssey 2017-2018

- Wrote 90% of the code for my entry to the 2017-2018 SkillsUSA Interactive Media and Video Game Design competition.
- Taught myself physics and math concepts I had not yet learned in school to implement into the game.
- Added a multiplayer mode in the span of 1.5 weeks while at the competition.
- Received a 9th place award at the National Level of the competition.

POST Your Game Aug 2024

- Created the entire game on my own for the 2024 GMTK Game Jam.
- Taught myself the Godot Engine.
- Designed the full game, including all assets.
